preferred member!**

**Use your FLEX SPENDING account to  
buy your MIGUN bed!**

**\*\*MIGUN PRICES WILL INCREASE ON  
JANUARY 1ST 2007\*\***

## OUCH! THE MIGUN BED HURT MY TAILBONE!

Did you say that to yourself after the jade probes made their first few passes under your lower back? Or on your way out of our center after your first treatment on the MIGUN bed? How about when you woke up the next morning?

After using the MIGUN bed, did your tailbone area feel tender, inflamed, even bruised? If so, what you were experiencing was most likely a HEALING REACTION. A healing or improvement reaction is different from an injury. In fact, it is the opposite of an injury. Your body is actually trying to heal your lower back with the help of the MIGUN bed.

**SO, WHY DOES IT HURT?** Most of us have problems with our lower backs, even if we don't know about the problems specifically. Some problems are obvious: herniated discs, fused vertebrae, curvature of the spine, misalignment of the spine, chronically tight muscles, spinal stenosis, arthritis, sciatica, etc. MIGUN of Greenville has seen it all.

**\*MIGUN prices are increasing in January 2007. Ask us about financing your MIGUN bed before the holidays! \***

## CALCIFICATION OF THE CONNECTIVE TISSUE:

Other conditions are less obvious but more common. The most common problem related to the lower back is calcification of the connective tissue along the spine. Healthy connective tissue is a lot like Saran Wrap: soft, pliable, smooth, yet strong. As we age, however, the connective tissue tends to harden up like cement, especially in the lower back. This can cause a whole host of health problems. In fact, one of

the best things you can do for your health is to soften up the connective tissue in your lower back. But, have you ever gotten a massage aimed at trying to break that stuff up? No.

As you age, your connective loses some of its youthful flexibility—due to wear and tear, stress, less than perfect diet, injuries, etc.

## MIGUN HAS GOOD NEWS!

Your tailbone will not always be sore after a treatment on the MIGUN bed. Calcification of the connective tissue can be reversed, and the MIGUN jade probes are uniquely suited for the task. The probes act like tiny jackhammers in your lumbar and sacral area – fairly gentle, but nonetheless effective jackhammers. First, the probes saturate your lower back with deeply penetrating far-infrared heat which dramatically increases blood flow (and,

therefore, oxygen flow) as well as energy flow to the area. Then, the probes aggressively massage the connective tissue until the calcified material is broken down and flushed out of the body. This process usually takes about two weeks of daily MIGUN sessions.

**REMEMBER:** Your problems did not appear overnight. Be patient and have faith in the process of healing. Come often to see what the MIGUN bed can do for you!

**MIGUN WILL BE CLOSED ON SATURDAY AND MONDAY FOR CHRISTMAS AND NEW YEAR'S**

**CLOSED**  
**12/23-12/25 & 12/29-01/01**

**Thank you for visiting. MIGUN of Greenville. We hope that you and yours have a blessed holiday season.**
