

Our Philosophy

MIGUN of Greenville was founded on the philosophy that every individual can take responsibility for his or her health. By combining the principles of Eastern Medicine with Western technology, we have made it our mission to become the leader in offering health-enhancement products.

MIGUN products promote balance and harmony in the whole body. In proper balance, the body has full potential to heal itself!

Asking people to take responsibility for their own health, MIGUN of Greenville is set up as a demonstration center where people can experience our amazing products on an unlimited free trial basis. At MIGUN, we understand that many people have trouble believing that something is FREE. Rest assured that all we ask for the free use of our center is that you share your experience of beautiful health with friends and family.

WHY IS IT FREE?

The number one reason is also our biggest goal: to reach out to EVERYONE. We believe in BEAUTIFUL HEALTH FOR ALL!

The Process

How often should you use a MIGUN product?
Everyday, of course!

Like bathing and brushing your teeth, MIGUN is a good habit to keep your body healthy and happy.

A daily MIGUN thermal massage helps rid your body of stress and pollution absorbed from the air you breathe, the food you consume, and the water you drink.

What is a healing or improvement reaction?

A healing reaction is a temporary process the body goes through as it moves towards a place of homeostasis (place of balance and healing) that may make a person feel WORSE before it makes her feel BETTER. For example, when muscles are overworked through exercise, they ache. As those muscles are continuously conditioned, they eventually will stop aching. A healing reaction works in the same way: once the ailment has been resolved, the symptoms will disappear and the body will be in better shape.

Detoxification Process

Hidden diseases and illness are revealed during a healing reaction as the body undergoes the detoxification process. Everyone experiences different healing reactions, and it is difficult to state who will go through which symptoms and when.

REMEMBER:

DIFFERENT BODIES =
DIFFERENT REACTIONS.

(NOTE: These symptoms may occur several times throughout the detoxification process.)

HEALING REACTIONS:

A SELF-DIAGNOSIS

The stronger your healing reaction is, the better for your body. You will undergo a more dramatic healing effect by having these reactions. We encourage you to continue to use MIGUN as healing reactions occur. ALL reactions are normal and good because they lead to a healthier more balanced body.

Typically, most healing reactions show within three to five days after using the MIGUN massage system. However, everyone is different, and both reactions types and timelines vary drastically. We encourage you to TALK TO US about your reactions; we can help you understand what your body is going through.
