

**EXPERIENCE THE FAR INFRARED TECHNOLOGY EVERYWHERE**

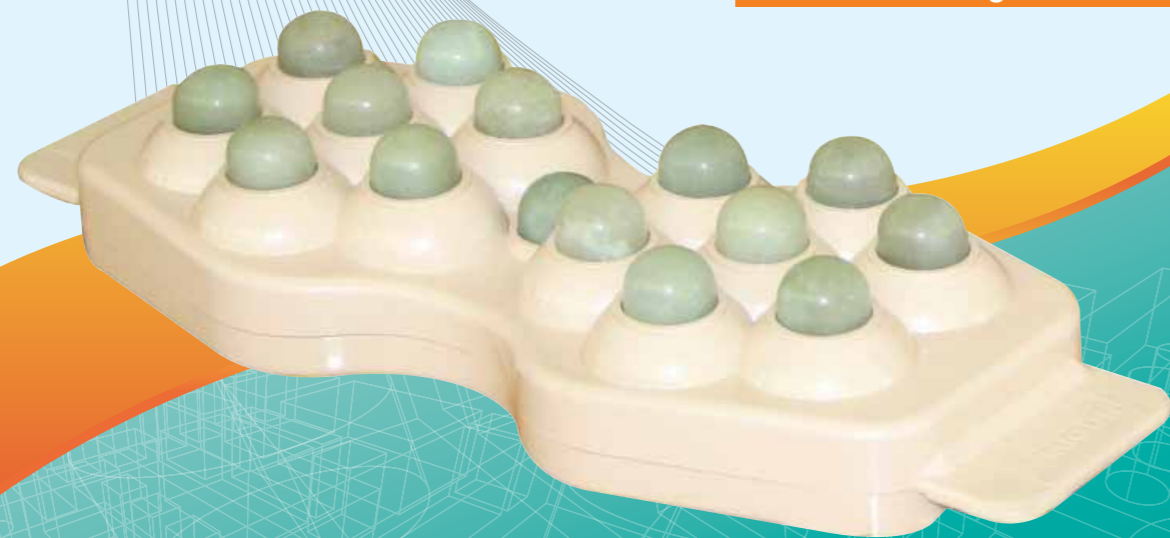

Migun HY-777 is what everyone is waiting for. This therapeutic massage device combines far infrared rays, heat therapy, and acupuncture in one. The 15-Way Jade Massage Head has jade probes that stimulate the acupressure points and emit far infrared rays 30% quicker while heating up. NASA concluded in the 1980's that far infrared stimulation is the ideal way for astronauts to maintain cardiovascular conditioning during long space flights. Migun HY-777 is a compact massage system for bringing vitality to your body.

**BENEFITS**

- Improves immune system
- Eliminates toxins
- Reduces stress
- Relieves joints and muscles due to arthritis
- Restores circulation and returns vitality and wholeness to the body

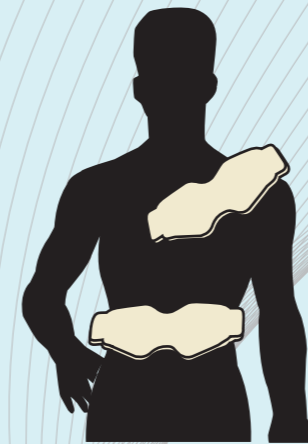

- Portable Massage Therapy
- Emits Far Infrared Rays
- Built-in Heating Function

**MIGUN HY-777**

Migun means Beautiful Health.

Place your **Migun HY-777** around your shoulder, waist, abdomen, knee or leg for fast-relief muscle pains.

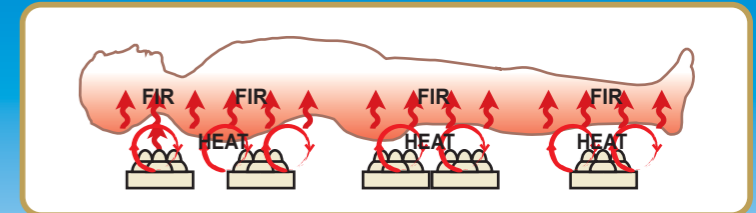

Place your **Migun HY-777** around your back, feet or abdomen area for wider and general pains.

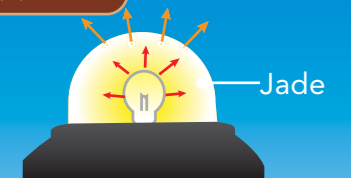

Lie on your **Migun HY-777** to get acupressure massage or relax the entire body.

**Far Infrared Rays**

The Migun HY-777's patented technology uses Far Infrared Rays, which refer to a specific type of light (heat energy) that exists beneath the visible spectrum. When the heat system in the Migun Mat is turned on, Far Infrared Rays enter as deep as 4-5 cm into the body. Far Infrared Rays have been proven to increase blood circulation, the lymphatic system, metabolism, and boost the immune system.

**Jade in HY-777**

Jade is a natural mineral which contains magnesium and calcium. It emits far infrared rays 30% quicker while heating up and 30% slower when cooling down than any other viable source. Because of these unique qualities, jade is ideal for heat therapy and healing.

**Heat Therapy**

Heat therapy dilates the blood vessels of the muscles. This process increases the flow of oxygen and nutrients to the muscles, helping to heal the damaged tissue. Heat application also facilitates stretching the soft tissues around the spine, including muscles, connective tissue, and adhesions. Consequently, with heat therapy, there will be a decrease in stiffness as well as injury with an increase in flexibility and overall feeling of comfort.

MIGUN MEANS BEAUTIFUL HEALTH.
